Employee Portal

Employees have the facility to log in and manage their leave, view their payslips and view their FS3s using the Employee Portal.
The Authorizer will also have access to approve / reject any booking done by the employee.

Dashboard

A software which integrates several modules that work directly from your web browser through a web-based software. Find, store and change information about skills, performance, qualifications, career details or education, via a user-friendly interface.

Payroll Panel

The new and improved Payroll Screen allows the user to choose a payroll, make all adjustments for a particular employee, save and calculate the payroll and view the updated payslip all in one screen.

Multi Year Selection

This feature will enable the user to switch from one year to another by simply choosing the desired year from the dropdown.
Once the year is selected, Salaroo will load the content for the selected year, which enables the user to issue any past year reports and/or even make changes to a payroll of a previous year.

Employee Creation AI

A feature where the user can copy the details of an existing employee to a new employee code.
The user can also change any of the details for the new employee before generating the new employee.
This feature also allows to create an employee portal account for the newly generated employee.
